Art Unit: 1656

DETAILED ACTION

1. In the preliminary amendments filed June 19, 2006, claims 3-5, 8-15, 18, 20-23 and 27 have been amended, claims 24-26 have been cancelled, and new claims 30-34 have been added. Therefore, claims 1-23 and 27-34 are pending.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Claims 1-23 and 27-34, directed to a fusion protein comprising (a) a mammalian surfactant protein precursor lacking its C-terminal propeptide or a mature mammalian surfactant protein, and (b) a mammalian plasminogen activator; a nucleic acid molecule comprising a nucleotide sequence encoding the fusion protein; a vector or a host comprising the nucleic acid molecule; a method for production of the fusion protein using the nucleic acid molecule; and a method of prevention and/or treatment of inflammatory and interstitial lung diseases using the fusion protein.

Species Election

This application contains claims directed to the following patentably distinct species of fusion proteins of SEQ ID NOs: 19, 20, 25 and 26 (cited in claims 12-13) and the corresponding nucleotides SEQ ID NOs: 6, 7, 12 and 13 (cited in claims 16-17). The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of

Art Unit: 1656

such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single species (one amino acid sequence from claims 12-13, and the corresponding nucleotide sequence from claims 16-17) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 or 6 is generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to

Art Unit: 1656

petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (571) 272-0948. The examiner can normally be reached on 8.00-4:30, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Manjunath Rao can be reached at 571-272-0939. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
